

The Loss of my Hearing

國三乙
陳玟亘

If you should abandon your sight or hearing, which would you choose? For me, I will choose to lose my hearing because I like to read so if I lose my sight I can't read anymore. I can have a quiet life and not have to worry about what people say.

The loss of hearing is not convenient but loss of sight is more inconvenient. I like reading so if I lose my sight I can't read but I can still read without my hearing. I also can focus on doing one thing because I can't hear any voices and I can have a quiet life.

It is dangerous for people to lose their hearing or sight, but it's better to have your sight. For example if one day you walk on the street and the car comes close to you, an accident will happen because you could not see. But if you lose your hearing, you can see the car and hide. So if I can choose, I will abandon my hearing.

Being able to see and hear are very important for everyone. Nobody wants to lose any of them. So if we see somebody who can't hear or see, we can't laugh at them. We should help them and keep them from danger.
