

If I Was A Time Traveller...

施思

If I could travel to the future and past, the first thing that I will do is to go back to when I was 4 years old and learn the musical instrument that I wanted to learn but didn't. Then I'll go learn other kinds of languages that I haven't learned. Also, I'll study the subjects that I didn't do well on. After I finish everything that I want to learn, I'll go to the future to look at the places that will get rich and go back to the past and buy those places. In the future, my family can live in the cheap house we bought long before in the past. It will be worth a lot of money in the future.

The second thing is my family's health problem. I will go to the future to see what is the problem that causes them to be sick or even die. I want to do this because of the death of my grandparents. My grandma died 20 years ago and I never got to see her because she died before I was born. My grandpa is very lonely even if my cousins, uncle and aunt are living with him. The day that he died, I was having school in Taichung, but he was in the hospital in Taipei, so my mom didn't get to see grandpa one last time before he died.

This is why I wish I could change the past and go back in time to fix grandpa's health problems. Even if he still dies, at least mom can see him one last time or hear his last words.
